

Product Description

myMEDIA 6102F Poster Paper Pro is a specially coated, water-resistant paper for printing with Latex, Eco-Solvent, Solvent and UV-curable inks and is characterised by good scratch resistance. Due to its good water resistance, the paper is also suitable for outdoor use. For outdoor applications which need to last longer than 10 weeks, the prints must be laminated for protection. Due to the special coating, high-quality, photo-realistic poster prints are possible. The ecological product is FSC® certified (FSC-C017326).

Physical Characteristics

Front material	Special coated, water resistant paper
Thickness / Weight	200 g/m ²
Colour / Finish	White, matt
Opacity	> 98% in dry state
Temperature range	+10°C to +30°C
Durability	Indoor and outdoor
Print side	Outside rolled

Printing Method

Compatible inks	HP Latex, Eco-Solvent, Solvent, UV- curable
Drying	The digital print must be ABSOLUTELY DRY! When drying the print, make sure that an adapted temperature is selected which, for one, ensures that the print is dry and stackable, but, for another, does not over-dry the surface. It is advisable to leave the prints open for a few hours before further processing. When folding, care should be taken not to damage the coating. Rolling up is not recommended, as this can lead to problems with adhesion due to the tendency to roll.

Processing and converting

Laminating	For outdoor applications which need to last longer than 10 to 12 weeks, the prints must be protected by lamination. Before lamination, the prints must be completely dry and outgassed, otherwise bubbles may form under the laminate.
Notice	As paper is a natural product, there may be some variations. Basically, it should be noted that coated inkjet papers should not be compared with poster papers used in other printing processes. They have different adhesive properties due to their finish. In the interest of optimal mounting, please be sure to point out the properties and processing instructions of this product to the mounting personnel!

Storage

Shelf life	Up to 1 year if stored in original packaging
Storage conditions	+15°C to +25°C at 50% relative humidity

Advantages and features

- Outstanding print quality
- Excellent price/performance ratio
- Great opacity
- High water resistance
- Good ink adhesion
- Latex, Eco-Solvent, Solvent, UV-curable inks
- FSC® certified (FSC-C017326)

The mark of
responsible forestry
FSC® C017326

Applications

- High quality posters
- Photorealistic poster prints
- Outdoor advertising
- Event announcements
- Indoor posters
- Outdoor billboards
- Opaque posters
